

## Complete, real-time Certificate Lifecycle Management

Actalis CertiManager is an enterprise solution designed to simplify and automate the entire lifecycle of digital certificates (SSL, Code Signing, S/MIME). It offers centralized, secure management compliant with the highest European security standards.

The **Certificate Discovery** module provides a comprehensive overview of publicly trusted SSL certificates associated with your domains,

including those issued by other certificate authorities. It enables you to monitor expirations, prevent service interruptions, and migrate smoothly toward a unified certificate management with Actalis.

Actalis CertiManager not only supports real-time issuance via Certificate Signing Request (CSR), but also enables you to receive notifications, download certificates, and track every operation.

### Types of Managed Certificates

 **SSL Server** Certificates

 **S/MIME** Certificates

 Certificates for  
**Code Signing**

 **SSL Client** Certificates

#### **ACME Protocol**

The ACME (Automated Certificate Management Environment) protocol is also supported, enabling complete automation of the SSL certificate management process, including key pair generation, domain validation, certificate download, certificate installation, and periodic renewal.

#### **Web Services**

The platform is also accessible via web services, for full integration with enterprise systems and to enable centralized, scalable management in a Managed PKI (MPKI) model.

## Subscription

With the subscription model, CertiManager offers:

- ✓ Centralized management for all certificates
- ✓ No hidden costs
- ✓ No surprises thanks to automatic renewal and full visibility into the certificates in use

	S	M	L
<b>DV 90 days</b>	∞	∞	∞
<b>DV</b>	50	100	200
<b>OV</b>	10	50	100
<b>EV</b>	✗	5	15
<b>MV</b>	∞	∞	∞

For further customizations, you can request a custom package.

## Benefits

- 
**Automation**  
 Issuance, renewal, and discovery fully managed.

---

- 
**Control and visibility**  
 Complete overview of the status of certificates.

---

- 
**Smart notifications**  
 Timely alerts to avoid expirations and interruptions.

---

- 
**Compliance**  
 practical support for meeting regulatory obligations such as **DORA e NIS2**.

## The first European Certification Authority

Actalis is a Certification Authority **qualified under the eIDAS Regulation** for the provision of certified services, recognized worldwide for issuing SSL Server certificates and **the only Italian member of the CA/Browser Forum**.

Since 2009 it has been part of the **Aruba Group**, whose parent company is **Aruba S.p.A.**, an Italian leader in data center, cloud, web hosting, email,

and domain name registration services. Today, Actalis serves key functions of the Italian Central Public Administration, as well as private companies of every sector and size internationally.

In **over 20 years of activity** as a Certification Authority, we have served tens of millions of users with our certified services, achieving the leading position in Europe (dati Netcraft).
